### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5-7, 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Suchdev (4508065). The figures show a longitudinal tube 28 with laterally extending nozzles 35.

Claims 1, 2, 5-7, and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Japan 6-264742. Figures 1-3 show a manifold at 7 connected to two longitudinal rails 21,22 with nozzles 1 for cooling cylinder banks.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-15, 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suchdev or JP'742 as applied to claim 6 above, and further in view of Sasaki (4667630). Sasaki teaches increasing oil flow to cooling nozzles 10 as a function of engine speed (figure 3) wherein for a given engine load, a minimum engine speed must be met before oil is delivered. Figure 7 shows a mechanical valve that delivers increased oil according to increased engine speeds. It would have been obvious to one of ordinary skill in the art to include either the

electronic or mechanical valve system of Sasaki in Suchdev or JP'742 to deliver the optimal amount of cooling oil.

***Allowable Subject Matter***

Claims 3, 4, 8, 9, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
